

## Computers

I really like computers. I bought my computer 2 years ago and I use it almost every evening. I use it for many different things. I sometimes write letters using *Word*. I like to practice my drawing using *Paint*. I like to listen to my favourite music with *Windows Media Player*. I often use *MSN Messenger* to communicate with my friends and family. It's really fast and easy to use, and the best thing, it is free!

Most of all I like to surf the internet. For me the internet is the best invention ever! You can use it for so many things. Sometimes I book a flight to another country on the internet. I can check my bank account on the internet. I can read the newspaper from my country and even see what the weather is like in my city! But for me the best thing about the internet is e-mail. I like to write letters, but e-mail is so much faster! And it's free. My friends or family anywhere in the world can receive an e-mail instantly. It's a great way to keep in contact with people you can't see on a day-to-day basis. I also like to use *facebook* and *SKYPE*.

I think computers, especially the internet, has made life a lot easier for people all over the world. People can communicate and exchange information from any corner of the world. I feel more connected with people. It's almost like having a window to the world in your bedroom!

## Please put in the missing verb

see      bought      listen      use      exchange      read  
communicate      like      write      surf      book

I really like computers. I \_\_\_\_\_ my computer 2 years ago and I \_\_\_\_\_ it almost every evening. I use it for many different things. I sometimes \_\_\_\_\_ letters using *Word*.
